### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Forse (3,613,969). Forse discloses a shirt press with an inflatable bag portion (212) and heated pressplates (34). A portion of each pressplate is continuously against the surface of the inflatable bag. With respect to Claim 14, radiator (184) is mounted on the base of the shirt press taught by Forse.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Forse (3,613,969) in view of Dosal (3,048,310). Forse discloses a shirt press with an inflatable bag portion (212) and heated pressplates (34). However, Forse fails to specifically disclose the presser bag including a body portion, two sleeve portions, and a collar portion. The inflatable form disclosed by Dosal has all of the features structural features in Claim 2. It would have been obvious to one

Art Unit: 3765

of ordinary skill in the art at the time the invention was made to have modified the inflatable bag portion of Forse to include a body portion, two sleeve portions, and a collar portion to enable a larger surface area of a garment to be treated at one time.

*Allowable Subject Matter*

5. Claim 19 is allowed.

6. Claims 3-13 and 15-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter: Independent Claim 19 is allowable because of the specific requirement that the shirt-shaped inflatable bag have a body portion, two sleeve portions, and a collar portion with heating filaments woven into at least one portion. With respect to Claims 3-7, the device specifically requires the device to include a shirt-shaped inflatable bag having a body portion, two sleeve portions, and a collar portion in combination with multiple heating bodies, one of which partially and continuously disposed along the surface of the bag. With respect to Claims 8-13, the heating bodies of Claim 1 are required to be heating filaments. With respect to Claim 15, the heating bodies of Claim 1 are required to have different radiant-heating capacities in different regions of the bag. With respect to Claim 16, the heating bodies of Claim 1 are required to have either a temperature sensor or a moisture sensor connected thereto to determine the temperature setting for the heating bodies. With respect to Claims 17 and 18, the heating bodies of Claim 1 are required to be electrical resistance heating elements.
